SESSION 2020-21

Dear Parents

As you know this is a very critical time for all of us in the Lockdown Crisis. So it is our responsibility to follow preventive measures for the safety and academic performance of our children. It is time to assist them not only their academics but also their life skills. Holiday home – work has been planned to keep them in touch with their studies as well as it provides a room for their creativity. For parents, it is the time to make children more self-conscious, self-disciplined and self-confident as well as aware of simple safety rules, mannerism and moral values.

So spend time with your ward fruitfully and purposefully.

*The weight-age of Holiday Homework will be 5 marks in Notebook Assessment as per given parameters:

GUIDELINES FOR NCS PRIMARY WING :

Messages for parents working with children at home

As public conversations around corona virus disease 2020 (COVID-19) increase, children may worry about themselves, their family, and friends getting ill with COVID-19.

Parents, family members, school staff, and other trusted adults can play an important role in helping children make sense of what they hear in a way that is honest, accurate, and minimizes anxiety or fear.

GENERAL PRINCIPLES TO AWARE CHILDREN :

1. Remain calm and reassuring.
2. Remember that children should follow your guidelines regarding corona-virus precautions. Generally they will pick up cues from the conversations you have with them and with others.
3. Make yourself available to listen and to talk.
4. Avoid making assumptions about who might have COVID-19.
5. Pay attention to what children see or hear on television, radio, or online.
6. Consider reducing the amount of screen time focused on COVID-19. Too much information on one topic can lead to anxiety.
7. Give children information that is truthful and appropriate for the age and developmental level of the child.
8. Talk to children about how some stories on COVID-19 on the Internet and social media may be based on rumors and inaccurate information.
9. Teach children everyday actions to reduce the spread of germs.
10. Remind children to stay away from people who are coughing or sneezing or sick.
11. Remind them to cough or sneeze into a tissue or their elbow, then throw the tissue into the trash or use own handkerchief .
12. Discuss any new actions that may be taken at school to help protect children and school staff.
13. Get children into a hand washing habit?
14. Teach them to wash their hands with soap and water for at least 20 seconds, especially after blowing their nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food.

- 15.If soap and water are not available, teach them to use hand sanitizer. Supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in schools and child care facilities.
- 16.Try to keep information simple and remind them that health and school officials are working hard to keep everyone safe and healthy.

Mt. Everest is at a height of 8850 m. Its base is at an elevation of 5450 m. The temperature here drops at the rate of 1° per 100 metres. If the temperature at the base is -6°C , what is the temperature at the top?

Maths Lab Activity

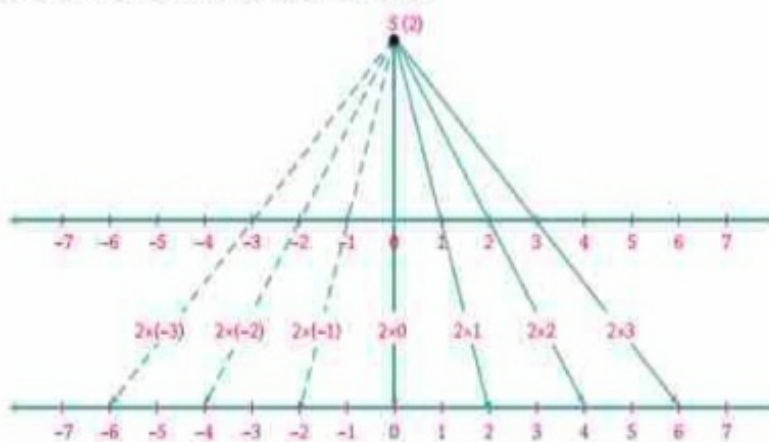

Objective : To verify the rules of multiplication of two integers with unlike signs.

Materials required : Ruler, chart paper and pencil.

Procedure :

Step 1 : Draw two number lines parallel to each other on a chart paper and mark integers.

Step 2 : Draw table of 2 on the number lines as shown :

Step 3 : Join 0 to 0, 1 to 2, 2 to 4, 3 to 6 to show $2 \times 0 = 0$, $2 \times 1 = 2$, $2 \times 2 = 4$, $2 \times 3 = 6$ by arrows.

Step 4 : Produce these arrows upwards to meet at point S.

Step 5 : Draw dotted line arrows from S passing through the negative integers on the upper line.

These dotted lines meet the integers as shown in the figure. You find

$$2 \times (-1) = -2, \quad 2 \times (-2) = -4, \quad 2 \times (-3) = -6$$

Thus, the product of two integers having unlike signs is negative.

Maths Lab Activity

Objective : To multiply two fractional numbers.

Materials required : Strip of a paper and sketch pen.

Procedure : Let us take two fractional numbers, say $\frac{3}{4}$ and $\frac{2}{3}$.

Step 1 : Take the strip of a paper and fold it into two halves.

Step 2 : Again fold the folded strip into two halves.

Step 3 : Unfold the strip.

Step 4 : Fold the fourth part.

Step 5 : Now fold the strip horizontally to divide it into 3 equal parts and after unfolding it make any pattern on 2 out of 3 with the help of sketch pen.

Step 6 : Unfold the fourth part. You will find that 6 parts are covered with pattern. This shows that this region represents $\frac{6}{12}$ or $\frac{1}{2}$ of the whole strip.

Hence,
$$\frac{3}{4} \times \frac{2}{3} = \frac{3 \times 2}{4 \times 3} = \frac{6}{12} = \frac{1}{2}$$

Higher Order Thinking Skills

Find the value of $\frac{0.11 - 0.011}{0.011 - 0.11}$.

Objective : To find the product of two decimals.

Materials required : Grid paper and colours.

Procedure : To represent 0.3×0.7 , following steps are followed :

Step 1 : Take a 10×10 square grid paper. Colour its 3 rows red as shown in the given figure :

Step 2 : On the same grid paper, colour 7 columns green as shown in the given figure :

Observation : A 10×10 square grid paper has 100 squares.

So, 1 square represents $\frac{1}{100} = 0.01$

and 10 squares represents $\frac{10}{100} = 0.1$

or 1 row or 1 column of a grid represents 0.1.

\therefore 3 rows (coloured red) represents $\frac{30}{100} = 0.3$

and 7 columns (coloured green) represents $\frac{70}{100} = 0.7$

So, the double coloured portion represents 0.3×0.7 .

The double coloured portion contains 21 squares, so it represents $\frac{21}{100} = 0.21$

Hence, $0.3 \times 0.7 = 0.21$
